analyses and discusses trends towards gender equality in the work place

this book is a practical guide for business professionals to develop and improve business intelligence and collective decision making within their organisation it proposes a progressive reconfiguration of the traditional business operating system using a nature inspired framework called swarm facilitation that enables and facilitates collective decision making organisations have followed the same rigid formula of problem solving and decision making for over 100 years it is dominated by centralised governance and pyramid decision making such an approach is no longer fit for purpose in an environment of employee disengagement artificial intelligence ai superintelligence and covid 19 fallout by the end of this book readers will be able to solve organisational problems and challenges collectively using swarm intelligence upgrade and future proof business operating systems to reflect a more collective decision making approach fit for the new connected economy and industry 4 0 embrace mindset quotients that support people working in a more networked self organising and collective environment the book is important reading for leaders and managers who are focused on building organisational capital and engagement and gaining value from the emerging technology by evolving their business operating system into a digital ecosystem as part of an ongoing digital transformation strategy it will also appeal to experts working in the field of organisational change and development both within the organisation and as consultants

bachelor thesis from the year 2007 in the subject business economics business management corporate governance grade 1 7 university of applied sciences neuss fom fachhochschule für oeconomic management neuss language english abstract in view of the growing competition the increased change in customers wants and the potential of new communication and information technologies more and more companies are faced with the need to permanently adjust and further develop their processes products and offer to be able to exist in the market a company must be in a position to recognise future developments early and include them in the strategy a company should therefore use management instruments which make it able to adjust strategies quickly and communicate them transparently in the whole company there is increasing criticism of the classical controlling instruments it is argued that controlling is supposed to provide management relevant data for the management which do not only include financial historical information as so far but also include future related non monetary figures against this background the balanced scorecard bsc is becoming more important it extends the previous focus on finance issues to assess the performance of a company with a range of other aspects and ratios the customer perspective the internal process perspective and the learning and development perspective are supposed to be considered equally next to the financial perspective in the bsc the targets of this thesis are split into a main target and a sub target the main target of this paper is split again into two parts the first part of the main target is to show and to explain the relevant theoretical framework of the bsc in particular to strategic controlling the second part of the main target is to analyse the bsc as a strategic management system and to give an overview about this strategic controlling tool as it is seen in academic literature the sub target of this paper is to provide a link between theory and practice by applying the theory to a current example taken from the insurance industry the result is a recommendation for a bsc as a strategic controlling instrument for that specific insurance company with this specific bsc for an insurance company comes also a tool for a well structured evaluation of the chances and risks involved with its application

selected peer reviewed papers from the 5th international conference on asian society for precision engineering and nanotechnology aspen 2013 november 12 15 2013 taipei taiwan

the enlightened shareholder value principle and corporate social responsibility are areas of increasing academic and research interest however discussions on the esv principle in relation to csr are very limited this book provides a critical analysis of the impact of the concept of esv embedded in the companies act 2006 on csr and explores the scope for reform along with analysing existing empirical research it presents the findings of an empirical study conducted to determine whether the concept of esv is capable of promoting or assisting csr the book also examines whether implementing an esv approach has had any impact on the csr practices of multinational corporations that originate in the uk and operate in developing nations as in order to assess whether the esv principle links to csr both its domestic and international impact need to be considered this analysis was undertaken through the lens of a case study on the ready made garment industry in bangladesh with some focus on the rana plaza factory disaster this study also assists in demonstrating the changes that need to be made to improve the current situation lastly the book addresses the need for reform in the area and provides possible suggestions for reform this interdisciplinary book will be of great interest to students and scholars of corporate law corporate governance and business studies in general as well as policymakers ngos and government departments in many countries around the world working in the fields of csr sustainability and global supply chains
