deep learning methods are achieving state of the art results on challenging machine learning problems such as describing photos and translating text from one language to another in this new laser focused ebook finally cut through the math research papers and patchwork descriptions about natural language processing using clear explanations standard Python libraries and step by step tutorial lessons you will discover what natural language processing is the promise of deep learning in the field how to clean and prepare text data for modeling and how to develop deep learning models for your own natural language processing projects

learn how to redesign NLP applications from scratch key features

- get familiar with the basics of any machine learning or deep learning application
- understand how does preprocessing work in NLP pipeline
- use simple PyTorch snippets to create basic building blocks of the network commonly used in NLP
- learn how to build a complex NLP application
- get familiar with the advanced embedding technique
- generative network and audio signal processing techniques
- description

Natural language processing NLP is one of the areas where many machine learning and deep learning

techniques are applied this book covers wide areas including the fundamentals of machine learning understanding and optimizing hyperparameters convolution neural networks cnn and recurrent neural networks rnn this book not only covers the classical concept of text processing but also shares the recent advancements this book will empower users in designing networks with the least computational and time complexity this book not only covers basics of natural language processing but also helps in deciphering the logic behind advanced concepts architecture such as batch normalization position embedding densenet attention mechanism highway networks transformer models and siamese networks this book also covers recent advancements such as elmo bilm skipthought and bert this book also covers practical implementation with step by step explanation of deep learning techniques in topic modelling text generation named entity recognition text summarization and language translation in addition to this very advanced and open to research topics such as generative adversarial network and speech processing are also covered what you will learn

learn how to leveraging gpu for deep learning learn how to use complex embedding models such as bert get familiar with the common nlp applications learn how to use gans in nlp learn how to process speech data and implementing it in speech applications

who this book is for

this book is a must read to everyone who wishes to start the career with machine learning and deep learning this book is also for those who want to use gpu for developing deep learning applications

table of contents

- 1 understanding the basics of learning process
- 2 text processing techniques
- 3 representing language mathematically
- 4 using rnn for nlp
- 5 applying cnn in nlp tasks
- 6 accelerating nlp with advanced embeddings
- 7 applying deep learning to nlp tasks
- 8 application of complex architectures in nlp
- 9 understanding generative networks
- 10 techniques of speech processing
- 11 the road ahead
